OATS AND WHEAT FOR THE SOUTH

We can never stop the millions of waste from soil erosion or the millions spent in the West for foodstuffs until every man child of us plants grain in the Fall. The demand in the West for grains grown in the West is increasing annually and

soon their demand will prevent them supplying us. The South is a natural grain country. All we need is a little more knowledge and a little more zeal for farm improvement. If we knew half as much about Oats as we know about Cotton we would double our Oats crop this Fall and not reduce our Cotton crop a pound next summer. The up-to-date farmers already know, but the great rank and file are not yet on the Oats and Wheat band wagon with the enthusiasm they will be in a year or two. The new knowledge on Wheat and Oats cultivation and fertilization is spreading rapidly.

Our Committee will gladly furnish free to every Farmer who writes for it a new bulletin on the HOW and WHY for GRAIN CROPS in the New South that will add wealth to every Farmer who reads it and follows its instructions.
